

Marcos Cervantes

Operations & Automation Specialist · Production Supervision · Available Remote

+52 (449) 363-51-39 | marcosca36@gmail.com | github.com/MarcosCervantes210009 | Aguascalientes, México

PROFESSIONAL PROFILE

Operations-minded engineer with 3+ years building systems that run day-to-day business processes, plus hands-on experience supervising production lines in a wire harness manufacturing plant. I automate workflows with AI and code (n8n, Python, LLMs), have worked across transportation, real estate, and banking clients, and have led a team to deliver a project in a third of the scoped time. C1 English, comfortable working in real time with U.S. teams in English and Spanish.

SKILLS

Operations: production line supervision, workflow design, process tracking, reporting, team coordination

AI & automation: n8n, Claude API, Ollama / LLMs, Python, FastAPI, web scraping, WhatsApp bots

Systems: PostgreSQL, SQL Server / T-SQL, MongoDB, REST APIs, Node.js, React, C# / .NET, Docker, Linux VPS, nginx

WORK EXPERIENCE

AI & Automation Specialist · UNE Bienes Raíces (Freelance)

Mar 2024 – Mar 2026

- Designed a WhatsApp bot with 5-intent routing (n8n + Ollama) that automated customer service across 470+ properties.
- Built Python pipelines to extract, clean, and load external data into PostgreSQL.
- Developed a multi-tenant admin panel with real-time metrics, push notifications, and WhatsApp alerts.
- Migrated the full infrastructure to a Linux VPS with zero downtime (477 properties, 476 conversations).
- Built a PDF parser (~103,000 records) with deduplication and a business intelligence dashboard for a banking sector client.

Technical Lead · Grupo Rainde

Jun – Aug 2024

- Led an intern team to deliver a complete project in 1 month, originally scoped for 3 months.
- Built reporting for enterprise applications, ran code reviews and sprint management.
- Wrote SQL scripts and stored procedures for high-volume data in ERP systems.

IT Analyst / Full-Stack Developer · González Trucking

Apr 2023 – Jun 2024

- Built a web portal and applications for the internal operations of a transportation company.
- Developed REST APIs connecting internal systems with external data sources.
- Automated repetitive tasks and data processing with Python.

Production Supervision & Software Development Intern · IMECOMEX

Sep – Dec 2022

- Supervised production lines in a manufacturing and warehouse environment producing wire harnesses.
- Followed the flow from raw materials to finished harnesses, keeping lines on schedule and output in line with quality requirements.
- Coordinated daily with the people on the floor to keep production moving.
- Developed in Java and built an Arduino UNO prototype; provided technical support and equipment maintenance.

EDUCATION

Software Development Engineering · Universidad Tecnológica de Aguascalientes · 2023 – 2025

TSU in Multiplatform Software Development · Universidad Tecnológica de Aguascalientes · 2021 – 2022
